Introducing MTDData

MTData Ltd is a subsidiary of an Australian owned company that develops all hardware and software in-house. This advantage allows MTDData to continually improve our products to the meet the changing needs of our customers and also allows us to produce a quality product at an affordable price.

Our products have been developed using the latest technologies to ensure our customers enjoy a long product life, low operating costs, and gain significant benefits for their business.

MTData's Vehicle Tracking

MTData's system consists of equipment that is installed into your vehicles and a Windows based system in your office.

The in-vehicle equipment is small in size and contains:

- Real-Time GPS Tracking Devices
- Nationwide GPRS Communications allowing 10,000 position reports a month for a low £10
- Digital Inputs and Outputs for monitoring ignition and other devices
- Optional In-Vehicle Phone Kit with restricted call numbers
- Optional G-Force Sensors
- Optional Engine Management Interfaces
- Optional Windows CE .net Mobile Data Terminals
- Laptop connectivity to the internet

The Windows based office system contains all the latest features such as customer way points, route monitoring, and management reporting. The system software is Windows .net based and uses SQL Server database to allow for seamless integration with other systems.

Benefits Enjoyed by our Customers

Our customers are gaining significant advantages in the market by saving costs and increasing productivity in their business by:

- Accurate time on site for customer charging
- Improving staff productivity
- Ensuring drivers take the most appropriate route
- Knowing the current location of all vehicles
- Dispatching the most appropriate vehicle to jobs
- Eliminating inappropriate vehicle usage

- Reducing phone communications and handset costs by call restrictions
- Ensuring drivers work appropriate shift times
- Monitoring drivers breaks and idling times
- Providing information to their customers
- Proof of Delivery of equipment
- Reducing vehicle kilometres
- Lower Fuel Costs

Testimonials

"...the MTDData tracking system has provided us with substantial benefits. Our employees have increased productivity and our vehicle costs have reduced. The system will pay for itself within twelve months..."

**STEVE TERMORSHUIZEN,
SEVRON ENVIRONMENTAL CONTRACTORS**

"...since introducing the MTDData system our vehicle's kilometers have reduced. This has lead to immediate fuel savings, reduced maintenance costs and our on-site productivity has increased...the system has been a worthwhile investment for us..."

BRAD KILLEN, J&B FENCING

"...we have installed the MTDData tracking units into our fleet of couriers and Taxi Trucks. We have found the product to be very reliable and have found the support from MTDData to be excellent..."

**DON GREENSMITH,
TRANSPORT ADMINISTRATIVE SERVICES**

Why Choose MTDData?

MTData manufacture and produce high quality, robust products at affordable prices.

We offer purchase, leasing, rental and hosting options. Customer may install the entire system into their premises if they choose.

MTData will work with our customers to upgrade and improve the system to meet the changing needs of our customers and to ensure that our customers have the best value system available.

We would welcome the opportunity to demonstrate our solution to your company and we are sure you will be impressed with our system, the benefits to your business and your return on investment.
