Introducing MTData

MTData Ltd is a subsidiary of an Australian owned company that develops all hardware and software in-house. This advantage allows MTData to continually improve our products to meet the changing needs of our customers and also allows us to produce a quality product at an affordable price.

Our products have been developed using the latest technologies to ensure our customers enjoy a long product life, low operating costs, and gain significant benefits for their business.

MTData's Transport Solution

MTData's system consists of equipment that is installed into your trucks and a Windows based system in your office. The in-truck equipment is flexible to cater for a range of trucks and includes:

- Real-Time GPS Tracking Devices
- Nationwide GPRS Communications allowing 10,000 position reports a month for a low £10.
- J1708/J1939 Can-Bus Engine Management Interfaces
- Two Dimensional G-Force Sensors
- In-Truck Phone Kit with restricted call numbers
- Windows CE .net Mobile Data Terminals

The Windows based office system contains all the latest features such as customer way points, route monitoring, and management reporting. The system software is Windows .net based and uses SQL Server database to allow for seamless integration with other systems.

Benefits Enjoyed by Transport Companies

Our customers are gaining significant advantages in the market by saving costs and increasing productivity in their businesses by:

- Knowing the current location and status of all trucks
- Monitoring drivers breaks and idling times
- Eliminating inappropriate truck usage
- Managing driver's acceleration, deceleration, RPMs, and travelling speeds
- Directing trucks on the least cost routes and ensuring drivers take the directed route
- Reducing phone communications and handset costs by call restrictions
- Gaining real-time engine information to protect against engine damage
- Monitoring oil temperature, oil pressures, coolant temperatures, brake applications, fuel usage,

engine hours, engine error codes and more

- Reduced Maintenance costs and Truck downtime
- Accident prevention and cost savings by monitoring cornering forces and heavy braking
- Customer reports of time on-site and loading / unloading times.
- Managing customers expectations by monitoring early and late arrivals and loading and unloading times
- Ensuring drivers work appropriate shift times
- Extensive reporting and graphs

Testimonials

"...we installed the MTData Transport system into our business and have immediately found significant cost savings. We believe that the MTData system will provide us substantial benefits and cost savings for many years to come..."

DAMIEN MATTHEWS, GTS TRANSPORT

"...we have installed the MTData tracking units into our fleet of couriers and Taxi Trucks. We have found the product to be very reliable and have found the support from MTData to be excellent..."
